High spring stiffness in vertical, lateral and horizontal movement, a load range from 35 to 1,080 kg and easy to install as well – the MF has everything required of a vibration damper on the high seas. The right choice for a wide range of mobile applications.

**Offshore performance pays off:**
- Sturdy: the design prevents twisting.
- Well-protected against environmental factors.
- The special anti-corrosion coating (chromium-6 free) defies wind and weather.
- Ideally suited for use in wet areas.
- Load range from 35 to 1,080 kg.
- Ideal for mobile applications due to non-release protection (up to 6 g).

**Examples of applications:**
- Offshore
- Inland waterways transport
- Compressors
- Generators
- Pumps
- Industrial machinery
